IBM

Frontend Developer Intern   *June 2024 – August 2024*

- Attended various live classes and masterclasses during the internship, enhancing expertise in software development and project management.
- Developed and optimized CommUnityLink app performance by 40% using technologies like Vite, React, and Tailwind CSS, significantly improving user experience.

Celebal Technologies

ReactJS Intern   *May 2024 – July 2024*

- Developed various projects including a to-do list and e-commerce website during ReactJS internship, showcasing skills in front-end development.
- Created SwiftShip, a shipment tracking website, using ReactJS and Tailwind, improving tracking efficiency by 50%.

SKILLS

- C/C++
- Java
- SQL
- React.js
- Next.js
- Node.js
- HTML/CSS/JS
- Adobe Creative Suite
- Git

PROJECTS

Placement Office | Github Link

- Developed a centralized platform, Placement Office, streamlining the placement process with modules for Login/Signup, applying for placements, and viewing student applications.
- Integrated features for posting new opportunities, preparing for placements, and viewing past placement highlights, efficiently meeting the needs of students and TPOs.

CommUnityLink | Github Link

- Developed CommUnityLink, a platform enhancing community participation by enabling issue reporting, status monitoring, and local government engagement through polls and discussions.
- Implemented features such as User Registration and Authentication, Issue Reporting and Tracking, User Dashboard, Mobile Responsiveness, Feedback and Ratings, and Newsletter Subscription, providing a centralized space for communication and civic participation.
